

Quarterly Performance Report of the Science Department 2022

- 1- Adding educational groups to the profile of faculty members in the science assessment system.**
- 2- 98% completion of the profiles of the members of the science measurement system.**
- 3- Sending the list of exclusions of faculty members from the scientific evaluation system to the experts of the Ministry of Health.**
- 4- Editing the profile of all faculty members in the system, including author integration in Scopus, Orchid, and Researcher and uploading photos.**
- 5- Adding new members to the scientific system on a monthly basis.**
- 6- Answering and training in-person clients about completing the required profiles in the science measurement system.**
- 7- Daily, weekly and continuous updating of science portal.**
- 8- Preparation of educational files related to scientometrics (Grammarly software guide, article overlap determination software guide, Scopus publication comparison guide, publication citation report guide, Pablones guide, Copernio guide).**
- 9- Responding to the feedback sent from the science measurement system on a daily basis (94 people during three months).**
- 10- Obtaining 96% of her score.**
- 11- Issuance of H-index certificate for faculty members.**
- 12- Frequent calls to faculty members to correct the deficiencies in their profiles.**

13- Adding scientific reports of centers (Research Center for Human and Animal Diseases, Health and Environment Research Center, Medicinal Plant Research Center, Microbiology Research Center, Psychological and Social Damage Research Center, Non-communicable Disease Research Center, staff articles University of Medical Sciences in reference databases) to the sub-portal of the Science Department.

Performance report of 2022 scientometric system based on scientometric system

Number of faculty members	Number linked to Scopus	The number of members linked to Google	Number of members with orcid profile	The number of members linked to ISI	The number of members with a ResearchGate profile	Number with CV link	University H- index in Scopus
207	188	203	203	158	185	191	57% (a growth of 9 points compared to 2021)

The number of articles in the citation database

data base	Year	Number of articles
Pub med	2022	133
Scopus	2022	161
ISI	2022	112

Programs 2022 and requirements

- **In the new year, the completion of the profile is expected to reach 100%.**
- **Cooperation of clinical faculty members to complete the profiles in order to get 100% score in Paish.**
- **Holding educational workshops in line with scientific metrics.**

With respect

Scientific Department of Ilam University of Medical Sciences
